- Wayne County, MI

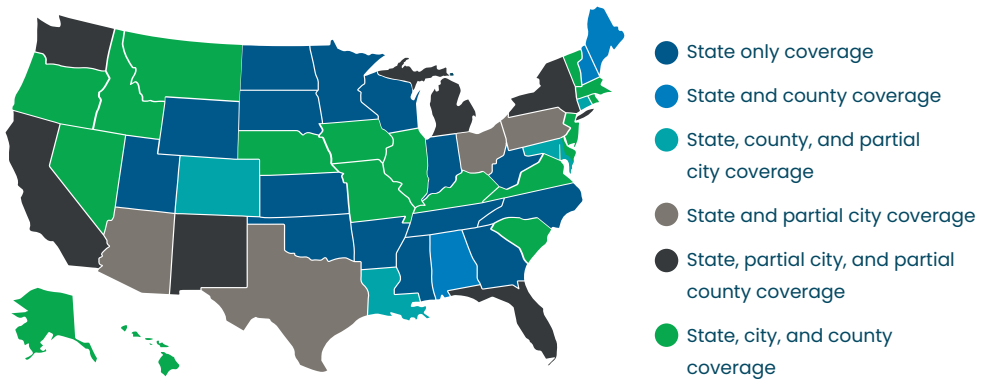

# Political Contributions Monitoring and Intelligence

## Campaign Finance Source Coverage

With over **710 million contribution records**, the COMPLY™ political contribution monitoring and intelligence platform, powered by illumis® technology, provides the most comprehensive coverage of contribution records on the market – helping your team mitigate pay-to-play risk and ensure compliance with federal, state, and local regulations.

The map below shows our data coverage, which depends on the various filing requirements in each jurisdiction. In some jurisdictions, a single source includes state, county, city, and town level contribution filings. In other states, local campaign contributions can be filed independently in

their respective local jurisdiction. Accordingly, we monitor the state campaign finance contributions but also monitor local municipality filings wherever available. If you ever have a question about a specific jurisdiction, please let us know and we'd be happy to confirm your coverage.
