Public Records Search and Monitoring

Public Records Intelligence for Accountability, Investigations, and Reputational Risk Management.

The COMPLY™ public data monitoring platform, powered by illumis® technology, provides the most current, comprehensive public records search and monitoring available. Our extensive data coverage lets researchers and analysts access all of the information they need with a single search, saving hours of time while maintaining accuracy.

Whether you're providing comprehensive research reports, maintaining compliance, investigating a subject, performing due diligence, and vetting or monitoring for the most current records and intelligence, COMPLY is the best way to ensure all of the information you need is at your fingertips.

Work faster and more efficiently while accomplishing more extensive, thorough research.

Advocacy groups, public affairs firms, top political campaigns, and others around the country depend on our data access solutions in the highest stakes environments. They rely on us to provide top quality solutions to meet their demanding needs. Our team works constantly to improve the platform, and we provide unparalleled dedicated technical and customer success support. We're always looking for new ways to expand the platform and help our customers succeed.

THE MOST CURRENT, COMPREHENSIVE PUBLIC RECORDS DATA INTELLIGENCE AVAILABLE.

Data coverage includes:

- Business registrations and professional licenses and IRS-990 filings covering all 50 states

- Court records for federal cases and over 160 state or local jurisdictions

- Political contributions and lobbying registrations at the federal, state, and local levels

- Regulations and penalties including environmental and labor violations

- Sanctions and watchlists including screening lists and penalties

- Hundreds of additional data sources ranging from White House visitor logs to Wikileaks

- Expandable and customizable data coverage
